**A FAIR EXCHANGE for PRESENT PRICES**

**For Your GRAIN or LIVE STOCK**

Just stop and think a minute how easy it is to grow apples, peaches, cherries, pears, plums and small fruits. Stop to consider their food values and the pleasure of watching them develop. Whether a land owner or land renter you can well afford to plant a little fruit when you can get it at these low wholesale prices.

Fancy pictures are a fine thing to look at but in these days of tight money and hard times what you want is **HI-QUALITY and LOW PRICE**. Find any little waste ground, road sides or corners will do. There are times when a small piece of paper is worth a lot of money in the way of checks or drafts. There are also times when a small piece of paper is worth a lot of money in the way of a wholesale price quotation if the price is right and you need the goods. This is one of these cases. These are days of serious thought, no fooling, and careful action. The dollar is hard to get and most places buys the least, but not here. Don't overlook our extremely low prices on the small-sized trees that we ship by Parcels Post. Old experienced nurserymen will tell you one year old trees, especially apples, give better permanent results. They are cheaper, withstand the shock when taken from the nursery and ship better, and the **PRICE** is very **LOW**. Order early.
